

O'Sullivan Plasterers Ltd

Environmental Policy:

Date of Issue: 3rd Nov 2014

Version No: 1

O'Sullivan Plasterers Ltd recognises its corporate and social responsibility to our local community and environment. We are committed to and comply with all relevant environmental legislation at local, regional and national level. We are committed to continually improve our performance through appropriate initiatives, controls, provision of resources and training of employees/sub contractors. Our aim is to minimise adverse impacts on the environment whilst being a source of good in our community.

Management objectives and goals are established and reviewed on a regular basis to ensure successful implementation of the Environmental Policy. These are based on a commitment to six environmental principles:

- Involving suppliers, contractors and customers in environmental initiatives
- Source and promote a product range to minimise the environmental impact of both production and distribution
- Zero tolerance to pollution
- Energy and material usage efficiency and minimal production of waste
- Effective and responsible waste management and disposal
- Promotion of product re-use and recycling
- Monitoring and maintaining of workforce awareness of environmental issues
- Meet or exceed all the environmental legislation that relates to our company

Our environmental policy's effectiveness is monitored and maintained by regular Management audits and is the corner stone of our intent to reduce our carbon footprint, improve recycling, reduce reliance on packaging, minimising waste, improve efficiencies on finite natural resources in all of our company's operations and departments.

All environmental commitments are an integral part of our day to day activities, clearly communicated to all employees/sub contractors and forms part of an application for ISO 14001 certification and registration under the EMAS scheme.

Gareth Holtam (Dir) and Ryan O'Sullivan (Dir)
